DETAILED ACTION

Allowable Subject Matter

Claims 1-8 and 10-15 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

With regard to claims 1, 5, 10 and 11: These claims are allowable over the prior art of record because the latter, either alone or in combination, does not disclose nor render obvious a spectrally filtered high power broadband light source comprising a spectrally filtered amplified spontaneous emission generated from an optical component wherein the source is formed using at least two discrete high power broadband light sources combined to yield a composite source, the two sources are produced by a wavelength seed section comprising a plurality of separate wavelength seed subsections arranged in parallel and wherein each of the seed subsections is arranged to produce high power broadband light in a particular wavelength range and comprises an independent electrical contact to allow dynamic tailoring of the source, in combination with the rest of the claimed limitations.

With regard to claims 2-4, 6-8, 12-14 and 15: These claims are allowable over the prior art of record because they depend from allowable claims.
